SAYANTAN SARKAR

Cloud Engineer | AWS | Monitoring & Networking

Bengaluru, Karnataka, India
hi2sayantan@gmail.com | +91 9163307990
LinkedIn | GitHub | Portfolio

Professional Summary

Cloud Engineer working in a Monitoring Service team, with hands-on exposure to AWS monitoring, CloudWatch Agent configuration, metrics and log collection, alarms, Linux/Windows environments, and cloud networking. Familiar with EC2, VPC, IAM, S3, VPC Peering, Transit Gateway, bastion hosts, and VPN-based private-instance connectivity. Interested in cloud operations, infrastructure monitoring, troubleshooting, and automation.

Professional Experience

Cloud Engineer – Monitoring Service Team *August 2026 – Present*
Axcess.io

- Work with AWS monitoring concepts, CloudWatch Agent configuration, and system metrics and log collection.
- Configure and troubleshoot CloudWatch alarms and dashboards for infrastructure monitoring and resource utilization.
- Practise cloud networking using VPCs, public/private subnets, route tables, security groups, and connectivity checks.
- Work with bastion-host access, VPC Peering, Transit Gateway, DHCP server setup, and VPN connectivity to private EC2 instances.
- Use Linux, Windows Server, and AWS CLI for cloud configuration and troubleshooting tasks.

Technical Skills

AWS: EC2, VPC, IAM, S3, EBS, CloudWatch, CloudWatch Agent, VPC Peering, Transit Gateway, AWS Client VPN
Monitoring: Metrics, log collection, dashboards, CloudWatch alarms, CPU and disk monitoring
Networking: IPv4, CIDR, subnetting, route tables, security groups, DHCP, VPN, bastion hosts
Operating Systems: Linux, Amazon Linux, Ubuntu, Windows Server
Tools: AWS CLI, Git, GitHub, Bash
Programming: Python, Java, C, SQL, JavaScript

Professional Experience

Cloud Engineer – Monitoring Service Team, Axcess.io Bengaluru, India
August 2026 – Present

- Worked with CloudWatch Agent configuration for collecting system metrics and logs from Linux and Windows environments.
- Configured and investigated monitoring alarms for CPU and disk utilization, and reviewed agent logs when metrics or log collection required troubleshooting.
- Gained practical experience with AWS infrastructure and network connectivity, including bastion-host access, VPC Peering, Transit Gateway, DHCP server setup, and VPN access to private EC2 instances.
- Practiced cloud operations fundamentals involving route tables, security groups, private subnets, and connectivity troubleshooting.

Projects

AWS Monitoring and Private Network Connectivity
AWS CloudWatch, EC2, VPC, VPC Peering, Transit Gateway, Client VPN, Linux, Windows Server

- Configured CloudWatch Agent, collected system metrics/logs, and created CPU and disk utilization alarms.
- Practiced connecting private EC2 instances using a bastion host, VPC Peering, Transit Gateway, and VPN-based access; investigated routing and security-group requirements.
- Set up a DHCP server and documented configuration and connectivity troubleshooting steps.

Community-Aware Bridge-Centric Structural Disruption of Criminal Networks via Composite Centrality and Signed Network Analysis
Python, NetworkX, Pandas, NumPy, Louvain community detection

- Analyzed a signed, directed social network using graph theory and community-aware network analysis.
- Applied degree and betweenness centrality and developed composite influence/attack scoring approaches to study influential bridge nodes and network disruption.
- Worked with the Epinions signed social-network dataset and simulated structural disruption scenarios.

Education

Techno Main Salt Lake *2023 – 2026*
B.Tech in Computer Science and Engineering **CGPA: 8.07/10**

Acharyya Prafulla Chandra Ray Polytechnic *2020 – 2023*
Diploma in Electrical Engineering **CGPA: 8.9/10**

Julien Day School, Ganganagar *2020*
ISC – Class XII **87.75%**

Julien Day School, Ganganagar *2018*
ICSE – Class X **89.2%**

Certifications & Learning

- AWS Cloud Foundations (2025)
- Python Fundamentals Bootcamp (2024)
- Preparing for AWS Certified Cloud Practitioner (CCP)

Languages

English, Bengali, Hindi
